

PROTOCOL 17

**Standaardisatie van mededelingen voor de binnenvaart
(2001-II-19)**

1. In de afgelopen jaren zijn er in verschillende landen internetsites met mededelingen voor de binnenvaart ingericht. De meeste van de huidige diensten stellen informatie ter beschikking in de eigen taal. Aangezien veel mededelingen van belang zijn voor de veiligheid of zelfs essentieel voor een goede planning van de reis, zou beschikbaarheid van mededelingen over de Europese waterwegen in alle talen kunnen bijdragen aan een verhoging van de zekerheid en verbetering van de concurrentiepositie van de binnenvaart.
2. Een standaardisatie van de mededelingen voor de binnenvaart moet
 - de automatische vertaling van de kerninhoud van de mededelingen in alle talen van de betrokken staten bieden,
 - de gegevens in alle betrokken staten in een geharmoniseerd formaat bieden, zodat de mededelingen gemakkelijk in reisplanningssystemen overgenomen kunnen worden,
 - een standaard voor inlichtingen over waterstanden bieden,
 - compatibel zijn met de gegevensstructuur van Inland ECDIS, zodat overname van mededelingen voor de binnenvaart in Inland ECDIS eenvoudig is,
 - de uitwisseling van gegevens tussen de verschillende staten vereenvoudigen.
3. Het is waarschijnlijk niet mogelijk om alle gegevens die in de mededelingen verstrekt worden, te standaardiseren. Een deel van de informatie zal alleen als „vrije tekst“ zonder automatische vertaling ter beschikking gesteld kunnen worden. De gestandaardiseerde onderdelen moeten echter alle gegevens bevatten die
 - van belang zijn voor de veiligheid van de binnenvaart
 - nodig zijn voor de planning van de reis.Aanvullende inlichtingen kunnen als vrije tekst worden verstrekt.
4. Informatie over de waterstanden is niet alleen voor de planning van de reis van belang, maar ook voor de veiligheid. Er bestaat op dit moment geen Europese standaard voor de vermelding van waterstandgegevens. De standaard bevat een schema met de voor de binnenvaart belangrijkste waterpeilen met hun nulpunten. De waterstandgegevens in de mededelingen kunnen op deze manier zoals gebruikelijk naar de nulwaarde van het waterpeil verwijzen en de software aan boord kan de absolute hoogte berekenen door gebruik te maken van de referentiegegevens uit de standaard.
5. Als de bevoegde autoriteiten mededelingen voor de binnenvaart in eigen land op een manier ter beschikking stellen, die ook voor anderstalige gebruikers leesbaar moeten zijn, kunnen zij conform de standaard en in het daarvoor voorziene internationale gegevensformaat ook op internet worden gepubliceerd.
6. Bovendien kunnen mededelingen conform deze standaard bijvoorbeeld ook op andere manieren ter beschikking gesteld worden, zoals via:
 - WAP diensten,
 - e-mail.

7. Als de gegevens op het niveau van de autoriteiten worden uitgewisseld, kan de standaard zinvoller worden ingezet en de informatie van de binnenvaart een groter gebied beslaan. Alle autoriteiten die gebruik maken van de standaard, kunnen de mededelingen van andere autoriteiten en staten in hun eigen mededelingen integreren. De bij de gegevensuitwisseling betrokken partijen (en autoriteiten) kunnen zelf vastleggen welke procedure gevuld moet worden voor de transmissie van gegevens en welke methoden moeten worden gebruikt voor de verzending of het downloaden.
8. Herzieningen (updates) van de standaard, met inbegrip van nieuwe gestandaardiseerde codes of extra talen worden door alle betrokken autoriteiten aan de Centrale Commissie voor de Rijnvaart medegedeeld en door de CCR op haar internetsite (www.ccr-zkr.org) gepubliceerd.

Besluit

De Centrale Commissie,

teneinde het gebruik van moderne informatiesystemen aan boord van binnenschepen en met name de verspreiding van mededelingen voor de binnenvaart door middel van deze informatiesystemen in een vroegtijdig stadium te bevorderen,

in de overtuiging dat de verspreiding van mededelingen voor de binnenvaart ook buiten de grenzen van het eigen land en taalgebied een bijdrage levert aan de verhoging van de rentabiliteit en veiligheid van het vervoer per binnenschip,

wetende dat standaardisatie nodig is om met behulp van deze informatiesystemen mededelingen voor de binnenvaart doeltreffend en zeker te kunnen verspreiden,

hecht haar goedkeuring aan de Standaard Mededelingen voor de Binnenvaart, die in het Duits, Frans, Nederlands en Engels als bijlage bij dit Besluit is gevoegd; waarbij in geval van onduidelijkheden in de begripsbepalingen of betekenis van de in de standaard gebruikte termen de Engelse versie maatgevend is,

verzoekt haar lidstaten en alle andere Europese staten waar binnenvaart plaatsvindt, de bevoegde autoriteiten en andere betrokken partijen te adviseren de mededelingen voor de binnenvaart overeenkomstig deze standaard uit te wisselen,

belast haar Comité Politiereglement de standaard verder te ontwikkelen en verleent het comité de bevoegdheid om zelfstandig een besluit te nemen over de - met name vanwege de ontwikkeling van de techniek - noodzakelijke wijzigingen; de werkgroep RIS dient hiervoor in samenwerking met de bestaande Europese deskundengroep „Notices to Skippers” voorstellen uit te werken,

verzoekt het Comité Politiereglement eventueel noodzakelijke wijzigingen van bestaande voorschriften, bijvoorbeeld van het Politiereglement, door de werkgroep RIS en de werkgroep Politiereglement te laten uitwerken,

verleent de Werkgroep RIS de bevoegdheid om zelf, volgens een door haar vast te stellen procedure, een besluit te nemen over wijzigingen in de referentietabellen van de standaard en deze bekend te maken.

Bijlage: Standaard Mededelingen voor de Binnenvaart

Deze bijlage is voorwerp van een afzonderlijke publicatie.

CC/R (04) 1 FINAL Add 2

Voorwoord

In de afgelopen jaren hebben veel landen internetdiensten voor berichten aan de binnenvaart geïmplementeerd. Veel van de bestaande diensten stellen de informatie ter beschikking in de taal van het land. Omdat veel berichten gericht zijn op de veiligheid dan wel van belang zijn voor de planning van reizen, zou de beschikbaarheid van alle berichten voor de Europese vaarwegen in alle talen bijdragen aan de verhoging van de veiligheid en de prestatiegerichtheid van de binnenvaart.

Dit ontwerp van een Europese standaard is ontwikkeld door de "Notices to Skippers Expert Group" en kan worden gebruikt voor als basis voor verdere ontwikkelingen.

Inleiding (Hoofd functies en prestatie)

De standaardisatie van berichten aan de scheepvaart moet

- een automatische vertaling van de belangrijkste inhoud van de berichten in al de talen van de deelnemende landen mogelijk maken;
- een geharmoniseerde structuur van gegevens in alle deelnemende landen ter beschikking stellen, teneinde de intergratie van de berichten in de systemen voor reisplanning mogelijk te maken;
- een standaard voor waterstand informatie ter beschikking stellen;
- compatible zijn met de gegevens structuur van Inland ECDIS, teneinde de intergratie van de berichten aan de scheepvaart in Inland ECDIS mogelijk te maken;
- gegevens uitwisseling tussen de verschillende landen vereenvoudigen.

Het zal onmogelijk zijn om alle informatie uit de berichten aan de scheepvaart te standaardiseren. Een deel van de informatie wordt als "vrije tekst" zonder automatische vertaling ter beschikking gesteld. Het gestandaardiseerde deel moet de informatie dekken, die

- van belang is voor de veiligheid van de binnenvaart (bijvoorbeeld: gezonken klein schip aan de rechter zijde van de vaargeul van de Donau, rivier-km 2010)
- nodig is voor reisplanning (Bijvoorbeeld: sluiting van sluizen, vermindering van doorvaarthoogte,...)

Aanvullende informatie (bijvoorbeeld: de oorzaak van de sluiting van de sluis) kan als vrije tekst worden gegeven.

Gegevens standaard

Berichten aan de scheepvaart moeten worden verstrekt in overeenstemming met bijlage 1, XML bericht specificaties. Het gebruik van vrije tekst moet tot een minimum worden beperkt.

Waterstandsinformatie

Waterstandsinformatie is van groot belang voor zowel de reisplanning als voor de veiligheid. Op dit moment is er geen algemene referentiestandaard voor Waterstandsinformatie (Duitsland gebruikt bijvoorbeeld de GIW, "Gleichwertiger Wasserstand", terwijl de Donau-Commissie de RNW, Regulierungs Niederwasser aanbeveelt, die enigszins anders is gedefinieerd. Bij de doorvaarthoogte wordt meestal gerefereerd aan een hoge waterstand, maar soms aan een lage waterstand. De waarden van de peilen worden gerefereerd aan de verschillende zeespiegelniveaus of aan speciale referentie punten). Daarom is het niet mogelijk waterstandinformatie te integreren in systemen voor automatische berekeningen van doorvaarthoogten.

Appendix A van bijlage 1 bevat een lijst van peilen met hun referentie waarden, die relevant zijn voor de binnenvaart. De waterstand informatie in het bericht kan worden gerefereerd aan het nulpunt van een peil, zoals het in het verleden werd gedaan, en de software aan boord kan de werkelijke hoogte berekenen door gebruik te maken van de referentie gegevens van de standaard.

Wijze van distributie

Indien de Bevoegde Autoriteiten Berichten aan de Scheepvaart in hun eigen land ter beschikking stellen zodanig, dat deze ook kunnen worden gebruikt door anderstalige gebruikers, dan moeten ze in overeenstemming met deze standaard ter beschikking worden gesteld in een XML-formaat dat is te downloaden van het Internet. Teneinde een download van een specifiek bericht mogelijk te maken, moeten Internetdiensten beschikken over een mogelijkheid om te selecteren op:

- een specifieke vaarwegsectie (vaarwegsectie nummer van de ID in overeenstemming met bijlage 1, tabel 1) of
- een specifiek deel van een vaarweg, gedefinieerd door de kmr van het begin en eindpunt (vaarweg hectometer van de ID in overeenstemming met bijlage 1, tabel 1);
- de geldigheid (aanvangsdatum en einddatum in overeenstemming met bijlage 1 tabel 1) en
- een datum van publicatie van het bericht (datum van publicatie in overeenstemming met bijlage 1, tabel 1).

Berichten overeenkomstig deze standaard kunnen bijvoorbeeld aanvullend worden geleverd door:

- WAP diensten,
- E-mail diensten.

Gegevens uitwisseling tussen de autoriteiten wordt aanbevolen. De autoriteiten die deze standaard gebruiken kunnen berichten van andere autoriteiten en landen integreren in hun eigen diensten. De deelnemende partijen (autoriteiten) kunnen de procedure van overbrenging van de XML berichten door push en pull methoden direct overeenkomen.

Bijlage 1: Structuur van de berichten en codering in XML-format**1. Introductie**

Deze bijlage beschrijft de structuur en het format van de gestandaardiseerde elektronische navigatie informatieberichten die kunnen worden verzonden door lokale autoriteiten aan (binnen)scheepvaart

1.1 Editie overzicht

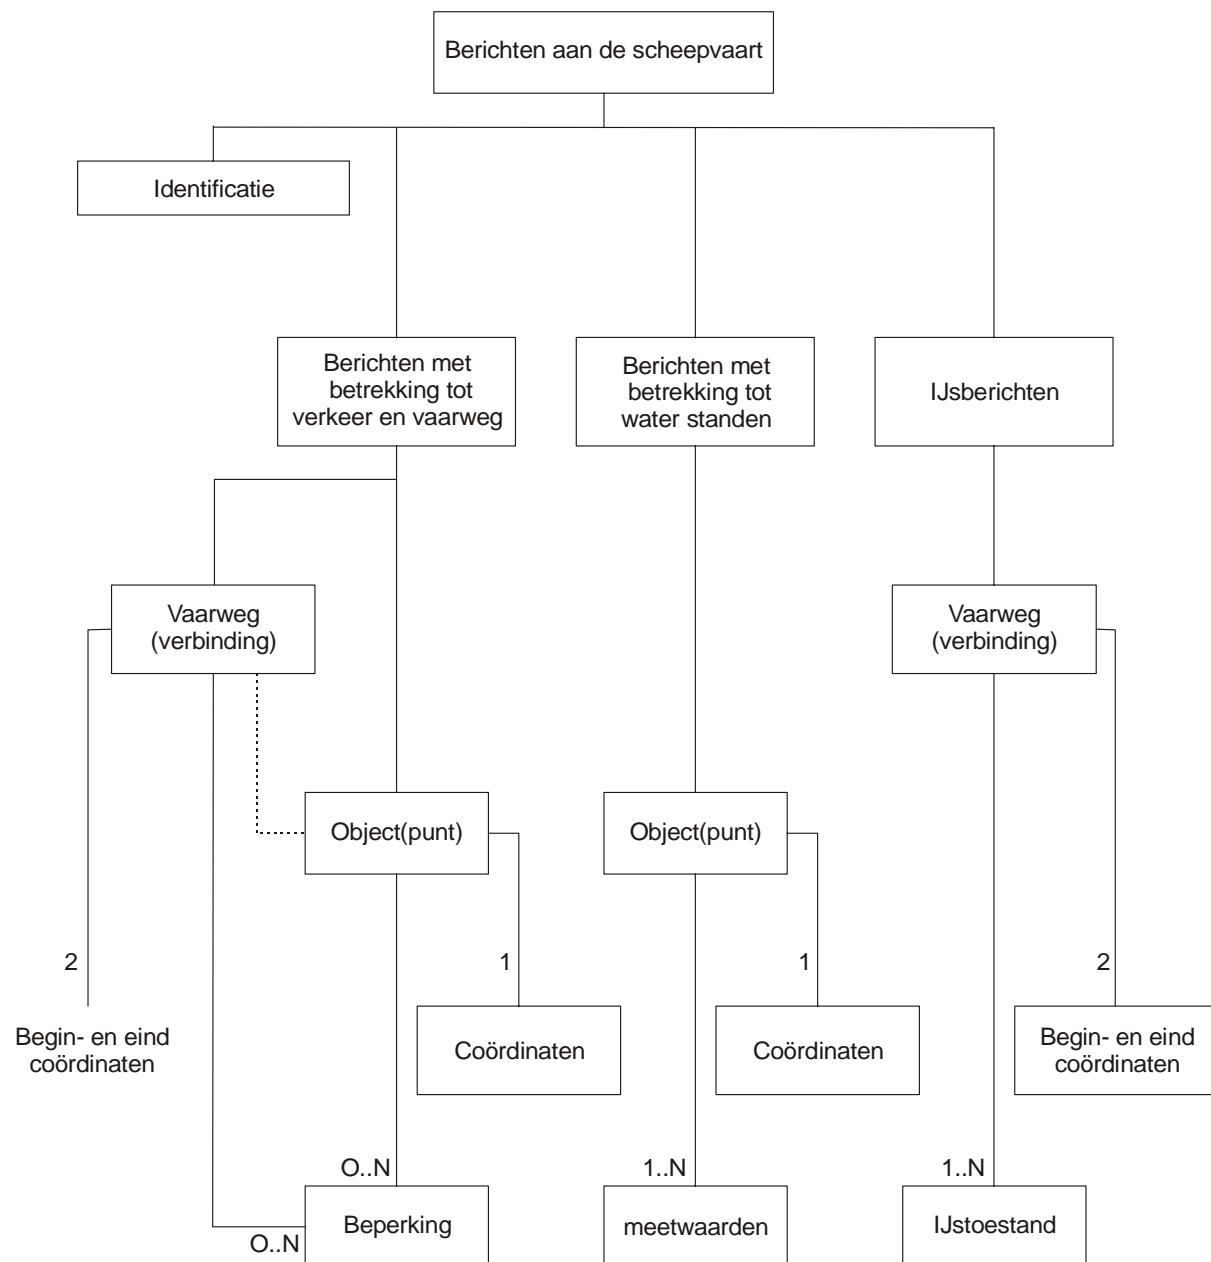

Editie	Datum	Beschrijving
1.0	28.5.2004	Aangenomen door de CCR in de vergadering van

De identificatie van elke versie van het document wordt weergegeven aan de onderzijde links van elke pagina.

2 Structuur van de berichten aan de scheepvaart**2.1 Algemeen**

Berichten aan de Scheepvaart, met nautische informatie voor de schippers over geografische objecten moeten de volgende informatie bevatten:

- Identificatie van het bericht.
- Vaarweg en verkeer gerelateerde berichten.
- Waterstand gerelateerde berichten zoals:
 - Berichten over de waterstand;
 - Berichten over de Minst Gepeilte Diepte;
 - Berichten over de doorvaarthoogte;
 - Berichten over de stuwdam status;
 - Berichten over de afvoer;
• Berichten over het afvoerregime;
 - Berichten over de voorspelling van de waterstand;
 - Berichten over de voorspelling van de Minst Gepeilte Diepte;
 - Berichten over de voorspelling van de afvoer.
- IJs berichten.

**Figuur 1 structuur van de Navigatie berichten**

Een gestandaardiseerd bericht in XML opmaak omvat dientengevolge ook 4 verschillende entiteiten:

- Identificatie sectie
- berichten met betrekking tot vaarwegen en verkeer
- berichten met betrekking tot de waterstand
- ijsberichten

Gewoonlijk worden in een bericht slechts 2 entiteiten ingevuld: de identificatie-entiteit en ten minste **één** van de entiteiten: Berichten aan de scheepvaart, waterstand gerelateerde- of ijsberichten (een mix van entiteiten, verschillende soorten van bericht informatie is niet toegestaan).

De entiteit berichten met betrekking tot vaarwegen en verkeer omvat begrenzingen voor een vaarweg(verbinding) of een object. De diagram toont eveneens dat een bericht met betrekking tot vaarwegen en verkeer betrekking heeft tot een vaarweg **of** een geografisch object (punt). Indien het bericht over een object gaat wordt de vaarweg entiteit ingevuld met de relevante vaarweg informatie zonder de begrenzing van de entiteit.

De entiteit van het bericht met betrekking tot waterstanden omvat als maatgegeven voor een object gewoonlijk een peilschaal.

De entiteit voor ijsberichten omvat informatie over de ijs conditie en voor een vaarweg (verbinding).

2.2 XML definitie overzicht

Deze paragraaf geeft een overzicht van de definitie van het bericht gecodeerd in XML. Bijlage A omvat een complete definitie voor de XML elementen inclusief de mogelijke opmaak.

Tabel 1, XML bericht specificatie

Nr.	Tag (Group headers and closers are boldly printed)	Description	Mandatory	Rule applicable
	<RIS_Message>			
1s	<identification>	Notice to Skippers Identification section	M	1
1.1	<from>String</from>	Sender of the message	M

Regels met betrekking tot tabel 1:

- 1 In één bericht moeten tenminste 2 secties worden ingevuld:
 - de identificatie sectie (1)
 - een van de secties:
 - Berichten met betrekking tot vaarwegen en verkeer (2),
 - Berichten met betrekking tot waterstanden (3)
 - IJsberichten. (4)
- 1 Groep 2.11 (sectie vaarwegen) is ook beschikbaar voor berichten met betrekking tot objecten (2.12)
- 2 Groep 2.12 (objecten) is niet beschikbaar voor berichten met betrekking tot de vaarweg (2.11)
- 3 In groep 4.3, moet tenminste één van de conditie-elementen 4.3.3. tot en met 4.3.6 ingevuld zijn
- 4 Als een conditie-groep verplichtende subgroepen bevat of elementen dan zijn deze alleen verplichtend als de groep op het hogere niveau is aangewend

2.3 Uitleg van velden

De betekenis van de verschillende velden gebruikt in de XML definitie wordt beschreven op de pagina "velden" van bijlage A.

2.4 Uitleg van codes

De betekenis van de verschillende codes gebruikt in de XML definitie wordt beschreven in bijlage A.

Het format en mogelijke waarden van de XML elementen worden beschreven in het XML schema in bijlage B.

standpunten/overwegingen – Berichten aan de Scheepvaart

- Berichten kunnen in twee categorieën worden onderverdeeld, namelijk DRINGEND en NIET DRINGEND. Dringende berichten omvatten altijd een beperking voor het scheepvaartverkeer. Daarom moeten er een of meer vermeldingen in de **entiteit beperkingen** zijn opgenomen. Indien er geen entiteit beperkingen is, is het bericht niet dringend.
- Breedte en lengte coördinaten refereren aan WGS 84 en worden weergegeven in graden en minuten met ten minste drie, maar te prefereren is, vier decimalen (dd mm.mmmm N, ddd mm.mmmm E)
- Decimalen in numerieke velden worden aangeven met een . (punt). Voor duizendtallen worden geen scheidingstekens gebruikt.
- Alleen cm, m³/s, h, km/h en kW mogen als eenheden worden gebruikt.
- Voor vaarwegen is er geen entiteit objecten. Voor objecten (bruggen etc) moet de entiteit vaarweg worden toegevoegd.
- Als een unieke ID moet de LOCODE overeenkomstig de Ship Reporting Standard worden gebruikt.

2.4.1 Onderwerpcodes toegeschreven aan berichten met betrekking tot vaarwegen en verkeer

Stremming

In het geval er geen navigatie mogelijk is:

- door alle sluiskolken van een sluis;
- door al de doorvaartopeningen van een brug;
- voor passage van a specifiek punt in de vaarweg;
- op een specifiek gedeelte van de vaarweg.

Gedeeltelijke stremming

In het geval er beperkte navigatie mogelijk is:

- door een of meer sluiskolken van een sluis, ten minste één blijft er in gebruik;
- door één of meer doorvaartopeningen van een brug, ten minste één blijft er open;
- voor passage van een specifiek punt in de vaarweg, een deel van de vaarweg blijft beschikbaar.

Oponthoud

Indien zich een beperkte stremming voordoet, bij een brug, sluis of op een vaarweggedeelte, tussen de vastgestelde begin- en eindtijd.

Bijvoorbeeld. Oponthoud van ten hoogste 2 uur op 13 november tussen 08:00 en 17:00 uur.

Gecodeerd:

```
date_start: 20021113
date_end: 20021113
time_start: 0800
time_end: 1700
limitation_code: Vertraging
Position_code: geheel
value: 2
```

<u>Geen bediening</u>	Indien een beweegbare brug gedurende een bepaalde periode niet wordt bediend. Deze periode moet binnen de normale bedientijden liggen. Geen bediening van een sluis is een stremming of oponthoud. Geen bediening van een beweegbare brug betekent dat passage onder de brug nog mogelijk is. Anders is het een stremming.
<u>Gewijzigde bediening</u>	Indien er een aanpassing in de normale bedientijden plaats vindt bij een sluis of een brug. Gewoonlijk betekent dit een beperking van de diensttijden, als gevolg aan werkzaamheden, en is het meestal geen verruiming. Een beperking in de diensttijden van een sluis betekent doorgaans een stremming. Bijvoorbeeld als een sluis wordt gewoonlijk bediend tussen 06:00 en 20:00 uur, en de diensttijden worden nu beperkt tot tussen 10:00 en 14:00 uur, dan zal dit resulteren in een stremming tussen 06:00 en 10:00uur en een stremming tussen 14:00 en 20:00 uur. Een stremming in diensttijden van een brug betekent doorgaans "Buiten dienst".
<u>Scheepslengte</u>	Indien ergens een geringer maximum lengte voor passerende schepen is toegestaan / mogelijk. Doorgaans vindt dit plaats bij een sluis (halve sluiskolk).
<u>Doorvaart breedte</u>	Indien ergens een geringer maximum breedte voor passerende schepen beschikbaar is. Dit vindt plaats bij werkzaamheden aan een sluis of brug. Deze code wordt ook gebruikt indien de beschikbare breedte van de vaarweg minder is, zelfs indien geen invloed heeft op de maximum beschikbare breedte van waterweg heeft.
<u>Vrije doorvaarthoogte</u>	Indien ergens een geringere maximum hoogte voor passerende schepen is toegestaan.
<u>Doorvaarthoogte</u>	Dit komt voor indien de doorvaarthoogte plaatselijk, bijvoorbeeld door een verwagen, is verminderd.
<u>Diepgang</u>	In het geval ergens een geringere maximum diepgang voor de doorvarende scheepvaart is toegestaan.
<u>Beschikbare diepte</u>	In het geval de Minst gepeilte Diepte is gewijzigd. Dit heeft geen impact op de maximum diepgang.
<u>Afmeerverbod</u>	In het geval ergens op de vaarweg afmeren niet is toegestaan.
<u>Gewijzigde markering</u>	In het geval er een wijziging in de vaarwegmarkering is ontstaan, zoals boeien, bakens, sectorlichten, scheepvaarttekens, etc.
<u>Werkzaamheden</u>	Andere activiteiten op of bij het vaarwater die niet vallen binnen de genoemde onderwerpen.
<u>Baggeren</u>	Baggeractiviteiten waarvoor geen van de andere genoemde onderwerpen bruikbaar zijn
<u>Militaire oefening</u>	Militaire oefeningen waarvoor geen van de andere genoemde onderwerpen bruikbaar zijn
<u>Evenement</u>	Evenementen (roei competities, vuurwerk etc.) waarvoor geen van de andere genoemde onderwerpen bruikbaar zijn

Mededeling Alle andere berichten waarvoor geen van de andere (gestructureerde) onderwerpen bruikbaar zijn

Bericht ingetrokken Het bericht moet worden gepubliceerd met een serienummer van het originele bericht

Indien voor een enkel bericht meerdere onderwerpen mogelijk zijn, dan wordt de beperking met de grootste impact op het scheepvaartverkeer geselecteerd.

2.4.2 Uitleg van ijs-codes

De betekenis van de verschillende ijscodes gebruikt in de XML definitie wordt beschreven in bijlage A.

De indicatie voor de Dikte zoals aangegeven in kolom 2 van de ijscodetabel geeft slecht informatie over de gemiddelde ijsdikte. De beschrijving kan gebruikt worden om een code te selecteren voor een specifieke situatie.

Appendix C - Specificaties van voorbeelden voor de implementatie van de Standaard voor de berichten aan de scheepvaart**C.1 Voorbeeld voor de presentatie van een bericht aan de scheepvaart**

In het volgende voorbeeld wordt het tekst formulier weergegeven in platte tekst, de inhoud van het bericht is grijs gearceerd. Delen, die niet verplicht zijn, staan tussen vierkante haken.

bericht aan de scheepvaart

Er is een nieuw bericht over[de/het rivierWasserstraße Donau in] Oostenrijk in de oorspronkelijke taal Duits van via-donau , uitgegeven door BMVIT, Schifffahrtspolizei,[op 10 juni 2003 om 11.10].:

Bericht met betrekking tot de vaarweg en het verkeer nummer 89/00 van 2003,
[uitgegeven door Strom- und Hafenaufsicht Hainburg met betrekking totbaggerwerkzaamheden [wegen verontdieping] in de periode van tot van toepassing [op alle scheepvaart,in alle richtingen].

[Aanvullende inlichtingen kunnen worden verkregen via internet, www.via-donau.org .] of [er is een normale meldplicht via VHF radio .]

[Op werkdagen van 7 oktober 2003 tot 25 oktober 2003 tussen 06.00 uur en 19.00 uur] is de volgende beperking van kracht op de/het rivier Donau, Strom-km bis Strom-km is de volgende beperking van toepassing: beschikbare waterdiepte [2,10 m ten opzichte van Laagwaterpeil Donaucommissie] aan de linkerkant van de vaarweg,

[[Op werkdagen van 7 oktober 2003 tot 25 oktober 2003 tussen 06.00 uur en 19.00 uur] is de volgende beperking van kracht voor de sluis Greifenstein strom km 1950,000 doorvaartlengte 200 m [ten opzichte van GLW] aan de linkerkant van de vaarweg]
Aanvullende inlichtingen in de oorspronkelijke taal: [xxxxxx]

Bericht met betrekking tot de waterstand

Dit bericht geldt voor de peilschaal Kienstock [van 10 juni 2003 tot 11 juni 2003]

Alle waarden hebben betrekking op het referentiepunt van de peilschaal

De gemeten waarde voor de waterstand op 10 juni 2003 om 10.00 uur was 197,18 cm

[Het verschil met de laatst gemeten waarde is +15 cm] [Op dit moment is de stuwdam gesloten] [en is er normaal scheepvaartverkeer].

[De voorspelling van de waterstand voor 11 juni 2003 om 12.00uur is 205,00 cm]

1.2 IJsbericht

Dit bericht geldt voor de vaarweg Donau van 4 december 2003 tot 5 december 2003

Op 3 december om 0.00 uur was er [licht drijfijss], [De scheepvaart is normaal]. [De vaarweg is bevaarbaar] [en er zijn geen beperkingen]

C.2 Aanvullende berichten BICS BOS

Voor verspreiding aan BICS BOS moeten de volgende berichten / entiteiten gebruikt worden:

- Kop / enveloppe bericht met de navigatie berichten zoals aanhangsels.
- Elk navigatie bericht is een HTML file met de XML entiteit in zich.

C.2.1 Kop / enveloppe bericht

De kop / enveloppe bericht kan worden gebruikt om een groep van nautische informatie berichten te verzenden.

Het enveloppe bericht is een normaal e-mail bericht met de navigatie berichten als aanhangsels. Het heeft geen ander doel dan te dienen als een enveloppe voor een groep van (html) navigatie berichten en kan worden verwijderd nadat de aanhangsels zijn opgeslagen.

De afloop datum in de onderwerp regel is het enige verplicht gestructureerde element in de kop. De afloop datum is de uiterste (afloop) datum van alle bijbehorende berichten. Indien de afloop datum van de enveloppe ouder is dan "heden" de hele groep is verlopen.

C.2.2 Navigatie HTML bericht

BICS BOS veronderstelt dat de XML entiteit inclusief een HTML bericht is, waarbij de HTML entiteit ook aangemaakte tekst van het bericht bevat.

De BICS BOS toepassing gebruikt de HTML entiteit voor de weergave van het bericht.

Nederland

Zuid-Holland

2002.0098.0 [Rotte; Prinses Irenebrug, Terbregge; Geen bediening](#)

I.v.m. het vervangen van de slijtlaag van de Prinses Irenebrug, in het weekend van 16 en 17 februari 2002, kan de brug niet bediend worden op zaterdag 16 februari 2002. De reguliere openingstijden van 09.00 tot 16.00 uur komen hierdoor te vervallen.

Info bij de heer G.J. Ketting van de afdeling Onderhoud Bruggen en Tunnels van Gemeente Werken Rotterdam, via tel.: (010) 489 47 02.

E-mailber. Hvm. Gem. Rotterdam, nr. 3/2002
